Education

The University of Texas at Austin

December 2025

Bachelor of Science, Computer Science (GPA: 3.36/4.00)

Minor: Business

Related Coursework: Software Engineering, Data Structures, Algorithms, Human and Computer Interactions, Data Management, Computer Networks, Principles of Machine Learning, Computer Architecture, and Principles of Computer Systems

Projects

SpeakATX – React, Python, AWS

May 2025

- Collaborated with a team to develop a responsive web application to assist minimal English speakers in Austin using React, Bootstrap and Tailwind CSS
- Implemented data collection via web scraping and external APIs to build a RESTful API hosted on AWS EC2 and RDS
- Streamlined deployment and testing workflows by configuring CI/CD pipelines with GitLab
- Created data visualizations of our resources using D3

BLOOM – React, Figma

April 2025

- Collaborated with a team to create a centralized mental health app with React
- Conducted user experiments with 20+ participants for feedback of A/B testing
- Created low-fidelity prototypes and high-fidelity mockups in Figma
- Implemented responsive UI components from user feedback to improve navigation and usability

CrustyDB – Rust

November 2024

- Designed components of a relational DBMS to support query operators and slotted paging
- Implemented page compaction and tombstone logic to manage memory fragmentation and support efficient value deletion and insertion
- Created and maintained cargo tests to ensure correctness at checkpoints

Extracurricular/Leadership

Women in Computer Science – Austin, TX

August 2022 – Present

- Assisted with set up and guiding guests at events
- Attended workshops to gain exposure to new technologies like databases and visualization tools

WiCS Hackathon (February 2025)

- Collaborated with a team of four to design and develop a food review app for UT dining halls using Figma and React
- Scraped dynamic dining hall menu data using Python using Selenium and BeautifulSoup
- Implemented Firebase Firestore to store and retrieve user-submitted reviews in real time

WiCS Programming Contest (October 2023)

- Collaborated with a team to solve problems using dynamic programming and data structures
- Debugged edge cases and optimized solutions under timed conditions

HackTX Hackathon – Austin, TX

October 2023

- Collaborated with a team of four to develop a web application using JavaScript and CSS
- Designed an algorithm to find the fastest route of finding groceries in a store
- Utilized Firebase with JavaScript to store grocery lists and map points in a database

Skills

Languages: Java, Python, C, JavaScript, HTML and CSS, SQL

Tools/Frameworks: Git, React, AWS, REST APIs, Pandas, Scikit-learn, Docker, Figma, Firebase
