

Maya Lee

Austin, TX | maya.v.lee393@gmail.com

(713) 548-6540 | <https://www.linkedin.com/in/maya-lee-98a91728a/>

Education

The University of Texas at Austin

December 2025

Bachelor of Science, Computer Science

Minor: Business

GPA: 3.27/4.00

Related Coursework

Software Engineering, Human and Computer Interactions, Data Management, Computer Networks, Principles of Machine Learning, Computer Architecture, and Principles of Computer Systems

Klein Forest High School

May 2022

Graduated Valedictorian

Projects

Maya's Art – Virtual Gallery – <https://github.com/MayaLee393/photo-gallery.git>

August 2023

- Designed a React app of a virtual gallery to showcase my paintings
- Used React components to develop responsive scrolling mechanisms
- Languages used: JavaScript, React, HTML, and CSS

PintOS – Toy OS

April 2024

- Collaborated in a team to design and debug a simple, working operating system
- Expanded on a toy OS to include priority scheduling, execute system calls, and virtual memory
- Languages used: C

CrustyDB – Relational Database

November 2024

- Designed components of a relational DBMS to support query operators and slotted paging
- Created and maintained cargo tests to ensure correctness at checkpoints
- Languages used: Rust

Extracurricular/Leadership

Women in Computer Science – Austin, TX

August 2022 – Present

- Assisted with set up and guiding guests at events
- Attended workshops to gain exposure to new technologies like databases and visualization tools

WiCS Hackathon (February 2025) – <https://github.com/MayaLee393/wics-2025.git>

- Collaborated in a team of four to design a food review app for UT dining halls
- Data scraped the dining hall menu website and implemented Firestore DB to store user reviews
- Tools used: Figma, Firebase with React, and Python Libraries such as Selenium and BeautifulSoup

WiCS Programming Contest (October 2023)

- Collaborated in a team to solve problems using dynamic programming and data structures

HackTX Hackathon – Austin, TX – <https://github.com/jzm284/HackTX2023.git>

October 2023

- Collaborated in a team of four to design a web application
- Designed an app to find the fastest route of finding groceries in a store
- Utilized Firebase with JavaScript to store grocery lists and map points in a database

Skills

Technical/Computer Skills: Java, Python, JavaScript, HTML and CSS, C, Rust, and Figma

Interests: Violin, Painting, and Drawing
